FAQs for Parents about the School Health Clinic

Is enrollment mandatory?

Enrolling in the SBHC is not mandatory, however strongly encouraged so that students may have access to quality comprehensive health care such as: immunizations, comprehensive physical examinations (for sports, and new school admissions), diagnose and treat illnesses, prescribe medication and provide other services similar to your doctor. If your child is not enrolled, the only care that the SBHC can provide are those services for which minors may consent to their own treatment.

How is a student enrolled in the SBHC?

To enroll in the clinic, parents or legal guardians should complete and return to the SBHC a Parental Consent Form. This form is available at the SBHC, the school's website and at the front office.

What is the cost?

There is no cost to parents for the services provided by the SBHC.

Does a student need to have health insurance to be seen at the SBHC?

SBHCs provide free care to students whether or not they have insurance. However, if the student has Medicaid, it is important to provide this information to the SBHC so that they will be able to bill for the services they provide.

What if the student already has a doctor?

If a student already has a Primary Care Provider (PCP), then the SBHC staff will supplement the care that he or she provides. If necessary, the SBHC staff will communicate with your child's PCP to make sure that your child receives the best care possible both in and out of school. If your child does not have a Primary Care Provider, the provider at the SBHC can take on that role.

Where is the clinic?

We are located in room 107 building 5.
